Highlights of Qualifications

Seasoned Software Engineer with over a decade of experience leading and delivering high-impact projects across accounting, cloud computing, and cybersecurity domains:

- Delivered several sales-generating features for carbon accounting SaaS at Sustain.Life
- Delivered internal and customer facing projects at Stripe, Amazon and Tenable
- Improved the efficiency of the SDLC by introducing new customer requests assessment process, writing better tooling, updating the feature design documentation templates and review processes
- Mentored software engineers to improve their skills and achieve their career goals

Work Experience

- **Sustain.Life (now part of Workiva)** Remote, Ireland
Engineering manager Sep. 2024 -
 - Lead a data ingestion and integrity team of 6 engineers.
 - Plan and resource features development in collaboration with Product team.
 - Conduct annual performance reviews based on personalized development and performance metrics aligned with company business goals.
 - Established and coordinate an architecture group that unites technical leaders across the department.
- **Stripe** Remote, Ireland
Software Engineer Jun. 2022 - Jun. 2023
 - Driven the development of some of the most complicated and requested by the customers features: Purchased Goods And Services and Data Quality.
 - Those projects were also marketing drivers for the company, featured on quarterly webinars.
 - Led development processes updates following the acquisition.
 - Worked with junior developers to improve their skills and domain knowledge.
- **Amazon** Remote, Ireland
Software Engineer Jan. 2021 - Jun. 2022
 - Led the development of AWS Timestream console.
 - Worked on multiple other AWS In-Memory Databases consoles.
 - Participated in the launch of Amazon MemoryDB.

- **Tenable** Dublin, Ireland
Software Engineer *Feb. 2018 - Jan. 2021*
 - Worked on an internal vulnerability database and its applications.
 - Designed and led the development of a few internal projects.
 - During 2018 added support for 25 new feeds (40% of the team's capacity).
- **BetBright** Dublin, Ireland
Backend Software Developer *Sep. 2016 - Jan. 2018*
 - Worked on the development and optimization of the backend microservices.
 - Prototyped new features before they went to development.
 - Integrated two new payment methods.
 - Worked on adding support for the new sports feeds.
- **Positive Technologies** Moscow, Russia
Software Developer *May 2015 - Aug. 2016*
 - Worked on an internal vulnerability database and its applications.
 - Developed a monitoring and control tool for scraping services.
 - Refactored the main scraping framework to increase development speed.
 - Mentored junior developer.
 - Worked on cross-team databases integration and synchronization.
- **NPTV** Moscow, Russia
Software Developer *Feb. 2013 - May 2015*
 - Designed and developed a framework for automated functional and integration testing of video distribution and broadcasting software.
 - Participated in the development of a continuous integration system based on my framework, Jenkins and Docker.
 - Worked on a few interactive TV applications (e.g. low-latency video conference app).
 - Developed an API for a cloud transcoding service.

Education

- **Moscow Aviation Institute** Moscow, Russia
Specialist degree, Applied Mathematics and Computer Science *2008 - 2015*
 - Thesis: Optimisation of intra-coding methods for codec H.265 (HEVC) for streaming

Activities and Interests

- **Programming:** Python Ireland Meetup speaker, used to be a competitive programming contestant.
- **Arts:** Photography and filmmaking, directed and filmed several short films.
