Highlights of Qualifications

Seasoned Software Engineer with over a decade of experience leading and delivering high-impact projects across accounting, cloud computing, and cybersecurity domains. Even though my main programming language is Python, I've also written in Java, Typescript, Ruby, and many more. Here are some of the highlights of my career so far:

- Spearheaded several sales-generating features for carbon accounting SaaS at Sustain.Life
- Delivered internal and customer facing projects at Stripe, Amazon and Tenable
- Improved the efficiency of the SDLC by introducing new customer requests assessment process, writing better tooling, updating the feature design documentation templates and review processes
- Mentored software engineers to improve their skills and achieve their career goals

Work Experience

- **Sustain.Life (now part of Workiva)** Remote, Ireland

Engineering manager

Sep. 2024 - Jun. 2025

- Lead Data Ingestion and Integrity team of 6 engineers.
- Plan, resource and deliver features in collaboration with Product team.
- Coordinate work on incoming requests from Support team, from triage to delivery of fixes.
- Provide career path guidance and coaching, helping talented engineers develop and excel.
- Conduct performance reviews based on personalized metrics aligned with company business goals.
- Lead incident response and resolution, ensuring quick recovery and implementing post-incident improvements.
- Established and coordinate an architecture group that unites technical leaders across the department.
- Manage technical recruitment process: defining requirements, conducting interviews, and leading onboarding of new engineers.
- Developed and implemented training program for new interviewers to ensure consistent evaluation standards.

Software Engineer

Jun. 2023 - Sep. 2024

- Driven the development of some of the most complicated and requested by the customers features: Purchased Goods And Services and Data Quality.
- Those projects were also marketing drivers for the company, featured on quarterly webinars.
- Led development processes updates following the acquisition.
- Worked with junior developers to improve their skills and domain knowledge.

- **Stripe** Remote, Ireland
Software Engineer *Jun. 2022 - Jun. 2023*
 - Participated in the development of internal tax content service. My work decreased time-to-live for new datasets, as well as reduced issues investigation time.
 - Significantly increased observability and reliability of multiple services.
- **Amazon** Remote, Ireland
Software Engineer *Jan. 2021 - Jun. 2022*
 - Led the development of AWS Timestream console.
 - Worked on multiple other AWS In-Memory Databases consoles.
 - Participated in the launch of Amazon MemoryDB.
- **Tenable** Dublin, Ireland
Software Engineer *Feb. 2018 - Jan. 2021*
 - Worked on an internal vulnerability database and its applications.
 - Designed and led the development of a few internal projects (APIs, dashboards, research tools automation).
- **Previous experience**
Software Engineer *Feb. 2013 - Jan. 2018*
 - Worked as a backend software engineer in multiple companies (details available on request)
 - Participated in the development and optimization of backend applications, vulnerability databases, cloud transcoding services, etc.

Education

- **Moscow Aviation Institute** Moscow, Russia
Specialist degree, Applied Mathematics and Computer Science *2008 - 2015*
 - Thesis: Optimisation of intra-coding methods for codec H.265 (HEVC) for streaming

Activities and Interests

- **Programming:** Used to be a competitive programming contestant. Have a few pet projects that I'll probably never publish.
- **Arts:** Photography and filmmaking, directed and filmed several short films.
